

TECHNICAL DATA SHEET ALCON COPPERSOLID MONTAGE PASTE

1. Product Description

It is a montage badigeon which consist of copper, ceramic and various special materials. It is used in places where expose to high temperature.

2. Properties

It provides easy montage and protection for screws, pegs, nuts, flanges and moulds which works under heat and hard environment conditions. And the most important thing is it provides easy removable feature for these parts.

It is valuable material which provides savings from money and time. For example, exhaust manifold, connection screws of pumps, stud deflection and their nuts may receive sticking in time and then corrosion occurs. It will be great problem when removing these in the future. And even screws may be broken while removing them and very big problems occurs. ALCON COPPERSOLID Cupreous Montage Badigeon is produced not facing with these problems. You can use it trustfully. It will protect your materials.

3. Technical Information

Form : Paste

Color: Copper

Odor : characteristic

Working Temperatures: [-40°C-+1100°C]

4. Application Details

You can use in following places trustfully:

- Shipyards where ship repair and production is done and in navigation institutions
- Auto repair industry and auto montage industry
- Moulding industry
- Thermal and hydroelectric power stations
- Iron, steel and cement factory
- Industrial production facilities
- Textile factories
- Paper factories
- Municipalities
- Petrol refineries
